### REMOVING-REFITTING REAR DARK-ENED WINDOW

1. Remove the rear side pillar cover working on the retaining buttons and bolt.
2. Remove the inner bolt fixing the darkened window.
3. Working from outside the vehicle, remove the side trim for the darkened window, then undo the bolts fixing the actual window, shown in the diagram.
4. Remove the side darkened window, working from the outside of the vehicle. Then remove the trim along the window housing, which is a press fit.

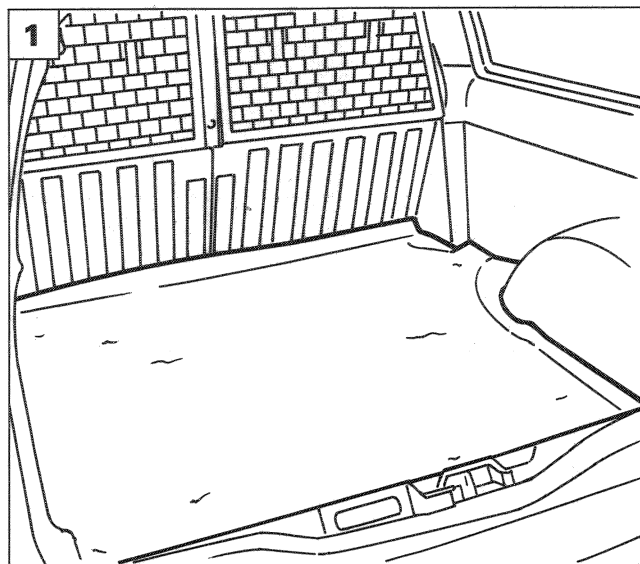

P3M01CM04

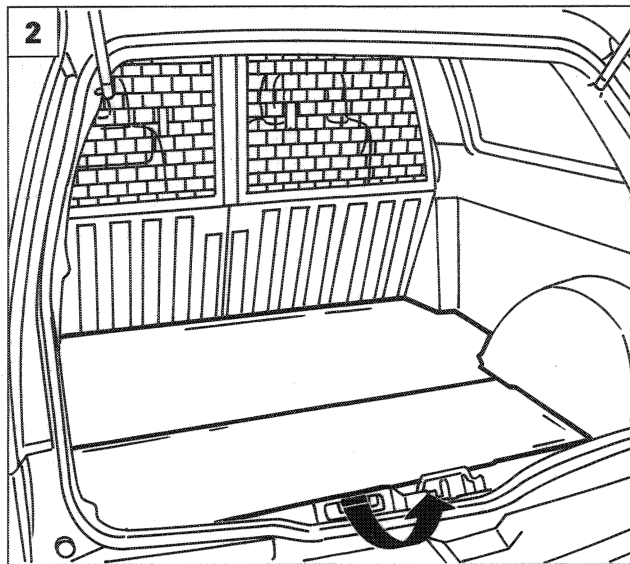

*When refitting, repeat the operations described for the removal, working in the reverse order.*

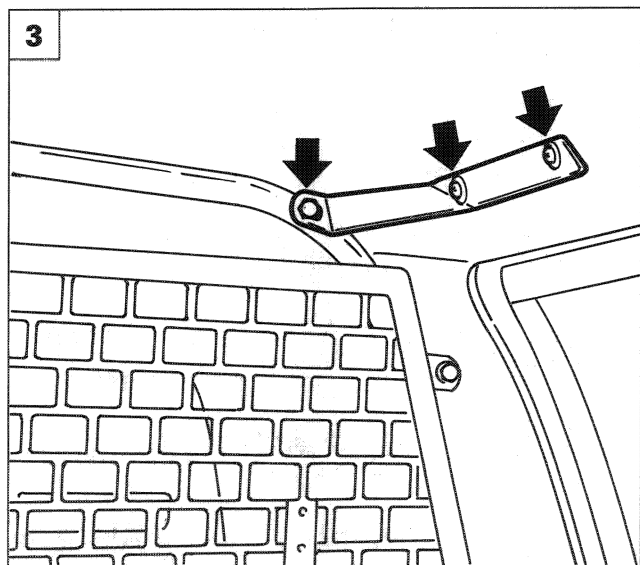

# 70.
